1	Outline how you will implement applicable data security and privacy contract requirements over the life of the Contract.	We as an organization abide by our company information security policy. We can provide you with this policy upon request.

3	Address the training received by your employees and any subcontractors engaged in the provision of services under the Contract on the federal and state laws that govern the confidentiality of PII.	Employees are trained via our employee handbook on PII and privacy in the workplace. We also conduct micro-training sessions throughout the year based on rising threats and best practices. Further, we utilize a role-based system for access to information. Should we use contractors, they are required to conduct a security questionnaire as well as sign a privacy contract that extends our policies to their service.
4	Outline contracting processes that ensure that your employees and any subcontractors are bound by written agreement to the requirements of the Contract, at a minimum.	If we were to use a contractor that has access to PII, they are required to complete a security checklist questionnaire as well as sign a privacy/security policy that extends our practices to their service.
5	Specify how you will manage any data security and privacy incidents that implicate PII and describe any specific plans you have in place to identify breaches and/or unauthorized disclosures, and to meet your obligations to report incidents to the EA.	Incidents would be reported to the EA within 24 hours with an incident report and postmortem of our response. This is outlined via our Business Continuity, Disaster Recovery, and Risk Management policies. Each of these is available via the Privacy Officer upon request.
6	Describe how data will be transitioned to the EA when no longer needed by you to meet your contractual obligations, if applicable.	Per FERPA guidelines, we would be able to provide the EA with a data export if requested.
